

A COMPLICATED AND BEAUTIFUL BRAIN

BY ANGELA GEDDES

FASD EDUCATION & TRAINING

A Complicated & Beautiful Brain is an in-depth book that helps the reader to identify and support individuals with complicated and often puzzling mental health and learning challenges that may be related to prenatal alcohol exposure. This book explores, in great detail, many case examples of what PAE effects look like across the lifespan with the goal of helping people feel better understood and supported.

Take a step towards furthering your understanding of the implications of PAE/FASD from a front line and family perspective, and discover hope and strategies that will help those affected to live their best lives.

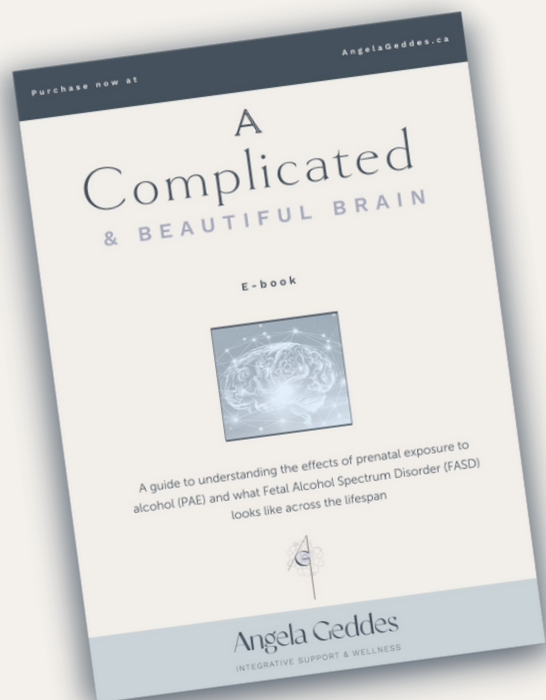

WHAT YOU WILL LEARN:

- the implications of Prenatal alcohol exposure (PAE) and what FASD looks like across the lifespan
- perspectives from individuals, Family & the front line and examples of what helps to improve outcomes.
- tips and strategies to address the unique and complex nuances associated with PAE/FASD

INTEGRATIVE SUPPORT & WELLNESS

FASD has a prevalence rate of 4-5%. It's present in all of our circles.

THE BOOK PLUS IN -PERSON OR VIRTUAL TRAINING

Help us to ensure that students have a good understanding of the impact of Prenatal Alcohol Exposure (PAE), and what FASD looks like across the lifespan within the core curriculum. This will ensure that all will be better prepared to offer helpful and relevant support to the many individuals and families they will be seeing that have been impacted by prenatal alcohol exposure but do not often know it.

Books are available for purchase at discounted rates for bulk orders*. The book's content is supported by an in-person or virtual training session** at the end of the course, lead by Angela Geddes.
